

I want to voice my concern and disappointment at hearing that there is a possibility that the "Indiana No Call List" may be repealed! Since the "Indiana No Call List" was formed, it has been wonderful to be able to answer the phone without worry that it would be a telephone solicitor!

It had become incredible at the number of "Junk" telephone calls that were received by many tax paying, bill paying citizens; in their own homes. I believe this to be some form of intrusion, and perhaps an invasion of my privacy.

I'm sorry that some people must earn their living in this manner, but just as I can get my junk mail reduced, I feel that I also have the right to reduce or limit the amount of unsolicited phone sales pitches I must receive.

Then I must wonder, is the threat of removing the Indiana No Call privacy law because the Washington lobbyist are funding the right people to encourage its very removal? This definitely goes against my wishes and very possibly my rights as a taxpayer. I DO NOT APPROVE!

I hope this becomes a public list, because during the next election, this will help me decide who NOT to vote for!

Thank you.
